

Right now I don't know how far I'll go with the WG book unless Dick comes up with something, at least encouragement. One of the things I plan is a decent if not exhaustive treatment of Nixon as GL, his undeviating Authoritarianism. I have much of this in an Authoritarian file, which I did not begin until relatively recently. I may miss some. So, with all you have to do, if you can keep a sheet of paper between the two of you (I'd never think of suggesting anything else between husband and wife,) for an occasional noting a word or two of clues, it could be very helpful. If I get it, I'll have only one shot and that under pressure much greater than a normal ultra-rush deadline. Such things as illegal ending of OEO, the various elements styled "impoundment", particularly illegalities to hurt the small and stretched legalities and special, costly favor for the rich. I should also go into the corrupt justice, using machinery of government to eliminate political opposition, more than in the party sense. It could be an awfully big book but shouldn't be. Thanks, even if you don't have time. HW 5/19/73
