I have not been copying and sending the WxPost's Park-KCIA stories because they have been long on thunder and short on lightening. An occasion name or act followed by reaction I'm sure is reported and includes the origonal name and fact. I have two separate files if you want any of this you've not obta ined elsewhere. One is Tungsun Park the other K-CIA. You recall my original interest with Tark, I presume, and the coincidence between his offices and those poorly separate from the same initial minus the K....Hardy Davis, a New Orleans bail bondsman who somehow ran afould of Garrison, as I recall with Cubam himes, has done his book on it.A copy sent to a college reached me today. I have kept no separate file on him so I can8t refresh faulty memory. I'm told it is amusing by the speedreader who sent it....Gary Schoener has been attempting to get his files from the CIA. They have acknowledged only 2, Feb and April '69. They've refused him both. HW 11/8/76
