

9 Sept. 1973

HW:

Here are those items from our San Jose incident file which appear promising from your standpoint.

No hurry at all, but please return when you've done with them, and, since there's no hurry, send them third class or some other cheap rate. These reach you 1st class only because there's a lot of other stuff also.

Sorry to hit you with such a bale of hay, but after reading through the entire file with the idea of boiling the whole thing down for you, I decided that I was too much in the dark about your actual needs and that only you can know what those are going to turn out to be and only after you see what's available.

Stories dated prior to the incident itself ~~XXXXXX~~ (29Oct70) are included to show incidents elsewhere leading up to this one and how a pattern of exploitation had developed.

Again, sorry I can't provide you with a more condensed and usable package, and hope that if it doesn't overwhelm you it will have enough of what you're looking for to make your effort worth while.
