By lunch time I'd written a speech about 10,000 words long for a sheep-and-goats job at the coming New York University law school assassinations symposium. (How I wish you were here to edit and cut what I feel so strongly must be said and now!) I even forgot all the firstOclass mail when I took the orders out! So I'kl probably let this wait until I leave for NYC. Anyway, the effort left me edgy, so while I was eating a calorieless salad for lunch I read that great McCabe and that sui generis Hoppe with yout last mailing. It was helpful! What a talent that Hoppe has! JL told me last night that the current Yale law review has an FOI bit with much mention of my spectro and 1/27/64 transcript suits, favorable. He'll send me a copy. Want one? .. . Happily no word from Sahl. Tge last thing I now want is to hear from him because I can't now leave.... SBS News has what it regards as a responsible and definitive JFK assassination project in the works. The only details I have indicate this is for 60 Minutes and will deal with Oswald and Ruby, allegedly not as I was first told, their "relationship." ZI may learn more in NYC where, if Steve Barber hasn't broken the 1/22/64 transcript story I will. Met with UPI reporter on Ray and spectro stories 4/17. Latter in confidence until I have assurance I have been given all. Court for status report 5/2. We have neutron testing but JL has not had time to copy and it does not include interpretation I have asked him to ask FBI for. I hope they do keep playing these kinds of games! I've told him not to fight if they say it is in WC I hope they do keep playing these kinds of somes. I have they do keep playing these kinds of somes. The stilly, HW 4/19/75 APR 2 1 1975
