

AUG 15 1975

JDW: I have obtained a Church committee staff copy of the texts of the brief on attempts to assassinate him that Castro gave McGovern. McG turned out a press release quoting it at some length if you'd like to ask for that. I've not had time to do more than count the pages of this copy to let you know in the event you'd like me to have it xeroxed for you. It would cost about \$3.50 It also has staff markings on it. I've not examined any but I assume they reflect interests or questions or both. This is the two versions, Spanish on the left of the page, Cuban translation into English on the right. It does not include the pictures. On reading the McGovern release I identified one of those captured as one who'd been arrested in the US, I think in connection with and I know in my files he is connected with "Cuban ~~Power~~ Power." You may remember they were pretty violent inside the US. At some point I'll probably read this to see if I can be of help where there are markings. But they are on deadline on that, I was told yesterday by one working on it. As a result of that conversation I think you'll find the Jean Daniel part in the report. In the sense also that when he was a JFK emissary and Castro knew it neither was about to off the other. HW 8/13/75

After I asked you about the Colby report a friend who could get it xeroxed mailed one to you. Today he was here, borrowed the Castro/McGovern report on assassination attempts against Castro and will be sending you a copy. No xeroxing charge.
