

Thanks for 11/18 and unread enclosures. Fortunately resting with legs up does not interfere with book packaging and orders are encouraging. I do rest, I am careful as I can be without becoming a vegetable (cancelled Capitol steps appearance for this a.m.), did have what I started to write about and couldn't finish, a rough time with psycho Belin(i.e., swelling of foot, not his head), and have come through apparently OK. Saw doctor Thursday on return. More on this and other things later. Every major paper seems to have suppressed both AP and UPI A wire stories, neither of which really went into substance of PM. London Times had fine story, copy coming. Nice volunteered plug from Les Whitten, after an experience he had when making his own speech in Atlanta. But please be assured that the only heavy things I do are beyond Lil and without alternative: carrying out the happily large and heavy cartons of outgoing books. The mailmen come to the house and I have the cartons ready for them on the hood of my car in the carport.. Besides, carrying weight is not the real problem. But I'm not overdoing and am trying, without too much success, to sleep longer. I'll listen to Brussel tape as I got for Monday a.m. blood test. Best and thanks,. HW 11/22/75
