

OCT 27 1975

10/24/75

Dear both - It was so pleasant a surprise to hear your voices I didn't even think to call to Lil. Her office is not close enough to where I was lying in to gather anything. Jim sorry.

My indignation about help from the young was because 3 were here. They had just moved enough around in the cellar to make room for the copies of PM due this coming week. They have been great for providing my transportation, too. (One is the son of a Colonel who was Haij's UN colleague when as a field commander Haij ordered a barrage against some of his own troops, killing 12.)

Used to write over an hour this a.m. The spread of the legs ~~required~~ required became too uncomfortable. I've asked a handy man to come & make you one I've designed where I'll have a pedestal rather than legs. He was hunting today.

Moving around felt good! I hope to be able to ease into more of it, gradually. Jim hopeful that with the aut.- way want level closer to what it should be discomfort & limitations will ease off.

Thanks again, much, for the ~~the~~ call

JDW, bin tired of reading / caught up on mpt clips) so, believing you may be concerned, a kind of reassurance before bed. Lil is soaking her achy feet, I'm unsteady on my feet (largely from so little use of them for 2 1/2 weeks) and she wavy if she heard me shuffling without her watching. Besides, you / to remove my own trousers, I'd disturb the Saran wrapping on both legs. One of those beautiful simplicities, like Te/you soap holders for the creeping typewriter. Intern told me it raises leg temp. 70 & helps circulation. This intent the nurses - only - were great. OCT 27 1975

What time I didn't spend with Lesar today arriving him to more than 600 CBS in Tenn. Superior Court (I studied their documents in the hospital while he made a speech for me) was largely a fairly peaceful effort to get my medical service to perform. They were negligent on this, too & I laid it out straight & strong.

Last time when I asked CIA asked for expired 3 days ago. Instead of going to court, as I can, I asked Lil to write them a lawyer's letter & to include a new request they will not like. A sweet young college soph for visited me the night before I left the hospital. She detected my uneasiness and told me I feared it was lymphatic. She said "Don't worry; you're tough." Whether or not I still am, I'm going to cut the part. With all she can't get to doing & the trip 120 miles I suggested to Lil - on the basis of the optimistic diagnosis that was wrong - that she not tie herself with all that lies ahead on PM that she try to rest & catch up instead of visiting. It was just for her but may be not for me. I was not without visitors. Aside from her who written & Lesar, all college kids. Made me feel good. I'd met only 3 before. One brought me a fifth of 15-year-old Scotch I found better than Chivas Regal. So, I even entertained. And sipped. I was ad quite supportive. Nights some nurses visited. (I stayed up for the 11:30 blood-taking & mid night injections) Several whose shifts were changing actually came to say goodbye & wish me well. Felt good. Funniest thing was when a black nurses' aide broke up when I called her "miss." ... One nurse went out foraging for a strong plastic trash bag. When she came back she started dumping all sorts of things in it: large plastic wash basin, covered bed urinal, plastic bottles of ointments for the skin, chin tray and God knows what else. "You've paid for it," she said. "Take it. You'll use some." She was right, too. So, there were many thoughtful real human beings who made it so much better. Best

The /no/ is as far as I know  
There is a better explanation I've not seen,  
heard or thought of it, no Post  
Average I saw.
