

Thanks for clips mailed 8/28. We all enjoyed the spoof. ~~Qm~~ We are pushing on PM, with Howard very helpful. We've done some cutting and are working on the very large appendix. New text completed except for final statement, to be short. Mostly mechanical now except for what I expect will be the excellent lacing between text and appendix on which Howard is engaged. Because JL spoke to another lawyer about Tatler's earlier ripoff I had to take time to read and mark up new ripoff of special issue. Terrible things by terrible people...Where events had dated pages in competed earlier text that was camera read we have solved the problem of avoiding repaging and redoing the entire index by including documents at that point, where the documents are relevant. Maybe a second point like this. It surely will look like a handmade book!
