

Thanks for the Scott Pacific Sun 9/12-18/75 piece. It is the Scott I know and keep wondering about, an able man who takes non-truths, part-truths and truths and weaves them together into the inherently incredible and misleading for no clear purposes. Some of this piece is plain lies. He tied neither Maheu nor the CIA nor the mafir to anything in his "Tying up loose end in Dallas." Some of the lies are so blatant and so clearly as illogical as they are known to be lies that I cannot but wonder again why a man of his talent and perception finds an endless chain of this kind of disinformation essential in this case and his undeviating practise with and on it. (Like the CRC being Hunt's when the real reason he quit the Bay of Pigs is over its organization and when he was off that and other Cuba projects before it was organized.) I could say more but I'm not up to it and I do not think it is necessary. I welcome keeping abreast of this odd matter of a man who has to know better doing these kinds of things, of which again I ask, "cui bono?" HW 9/22/75
