

JDW:This should reach you before tomorrow's NYTimes and its account of the church committee's report. Do not copy it for me. JL is in DC and will either get me a copy or make me one if for no other reasons because of our interest in the CIA and publishing. Now if you see any special articles on that, please do send. It is the kind of thingon which some reporters may follow up and some editors not kill. (All I now know is from the evening TV news. I heard no radio all day.)...We have a little other news. One of the really sweet young college girls called before supper to ask if instead of going home she could stay with us for about six weeks, with her parents' OK. She offered to work. I asked if she could mow grass. She said she could jockey a rider. That I do, I said. Could she push one? She had, she admitted. I laughed. I need that exercise. And we ~~trix~~ turned down her offer of \$20 a week room and board. But maybe I'll catch up on some filing and Lil on some flower-bedding. 'Tain't that we can't use the money. We'll soon enough be broke and in further debt because today we ordered an overdue new room with the roofer agreeing to wait for about a third of the cost. But in addition to the roof's need it will be reflective. Lil, who used to be impervious to summer, for several years has felt it hart. And I'm half-encased in <sup>synthetic</sup> armor now. If flexible...Weather is always news. From over 95 last week we're due for a close-tofreeze tonight. Make you appreciate Frisco more? Best to 'e. HW 4.26.76
