

JDW: Recently I commented that my reform on sleep had been disturbed by a student's midnight call. I talked with him for an hour. ~~The~~^{His} visits with five friends today is the result. They can take some load from JL and I think they will from me, if JL can organize himself. They are close to him, in DC. But to me the interesting point is that their aversion to Lane turned them to me. I took the time, by phone and today and they are turned on, motivated, and maybe we'll have a little help. If not it gave me a chance to relax a little while Lil toiled. I enjoy sensible young people of decent concern. HW 1/24/76
