

JDW, HR: I'm troubled about troubling you with this medical stuff. It is not only what Oscar Wilde said about friends. It is what I have asked of you in any eventuality that impels me to send you copies. Not to worry you. At best there is no perceptible medical improvement and the situation at GHA is worsening. There is no other reasonable explanation. There is no need for either of you to read any of this medical stuff unless you want to. While I'm glad it happened today and is past since it had to happen, it sure loused up a day I began by preparing to write once the mail was cared for. It would have been more oppressive if we had not had friends for supper so the woman would not have to cook on the eve of her taking a vacation. She leaves in the morning. (With a prediction for sleet followed by snow! If ~~that~~ gets to the airport in time her first stop is Miami, then Aruba...I had two extras of the Village Voice Youngblood article, part of a series. Haven't read. JL says it is terrible. HR: Please be even more alert to any McDonald clips or appearances. He may have gone too far in repeated commercialization of the Church committee. I've told a Member. Best HW 1/27/76
