

JDW:Yoyr 1/6 note on the 1/5/77 Pacifica bullet story, "looks phoney," is probably understated. There are two such stories neither one of which has appeared in the Post yet. It is a disinformation deal for the FBI but the Dallas man, ester, may be serious. it is an indication of how little the committee knows - and I mean not only about the basic fact of the case- that they go for it and opt a pointless fight over it. So it all gets bogged down in irrelevancies all over again. However, these seem to be the best of possible times. WxStar placed the "find" at 61 steps from TSBD. Impossible if used in assassination. So the FBI plays its games and the committee led by its demon chief dance to the cacaphony.

On Graham making it a troika, all I can say about how I feel is that I wish I'd had the medical opportunities they do. In Graham's case if it really is tests it has to do with at the minimum blood composition and more likely a scan of the veins with injected radioactive dye. There may have to be a period of anticoagulant injection first. Was with me but that may have been from neglect not need to retard coagulation. Understand new clots can form at point of injection.

But I'm evading without intending it. How does it feel: Entirely undistinguished.

The other bullet story seems to be a retreading of Thompson, the alleged finding of an alleged witness to identify an alleged other stretcher. Thanks and best, HW 1/10/77
