

JDW; ¶ 1cl and 3cl both came together. "ead more recent 1 cl to be able to know latest if any press inquiries re "ane. Two hours yesterday with ChiTrib man who has been on a story more than a week. Will do a long piece for coming weekday issue. Les Payne, back from long trip to SG, says thinks feds would like to be able to charge Lane in massacre. Russell, who stays up for the late night schmalz, says that last night Tom Snyder, with Garry and others, gave Lane a working over. Hear Phil Donahue (who was great with his radio talk show) did the same three shows running. I referred ChiTrib to "ave for future, not because he had the need on this story. I suspect there will be a story future involving Lane and Dave's files are you know how good! If any reporters should consult them if they are ready, he'll be able to guide. If not ready, he'll be able to inform them. ...Read other clips in 1cl. Very interesting and not reported here. McCabe column excellent. Thanks. HW 12/16/78 If the article on the benefits of moderate alcohol is not clear enough when "il sends. let us know and we'll replace. "achine needs new drum, which we expect soon.

DW - In today's mail there were two fat packages of Jim Jones clips from the SE papers from Jim White. Judging from what you said last night when we spoke of the ChiTrib story/reporter you have no immediate use for them. I'm keeping them in a separate file under Lane. I'm also keeping those from Jim in a separate folder for the possible use of DC or NYC reporters who will be familiar with most of what I've seen but may not be with Jim's. ...I did not occur to me when we were speaking but the reason you had not received the separate copies Lil made for you is that I had not sent them. Because of the increased postage costs and my profligacy in buying useful tools I'm again cost conscious. So I was accumulating miscellaneous items in an FBI box that carries letter-sized paper and copies without foling. I included some recorded tapes and some carbons of final versions of affidavits, which can serve until you get xeroxes. What we do is make but a single carbon, which I read, often in takes while Lil continues the retyping. I note errors or corrections of questions about whether the strikeover is heavy enough to indicate a correction with the correcting tape, etc., then have no more use for the carbon. Odd that I didn't recall the clip copies in the package I'd just sealed supertime. It went out 4cl in today's mail. ...Time-pressed JL filed a formal written request for the judge to ask Shea to appear next Wednesday. Reluctantly because it is not the normal way (as though the DJ is normal or follows the Act) but very well done. "e phoned me when I was visiting my arthritic (distinguished from angina-ed) neighbor of my years. Russell, a mid-west conservative, has become interested in these goings-on and didn't mind the call there. Now Paul, with the angina, is the oldest of us and the strongest. "etired farmer/machinist he'd just ground and wedged my smaller ax. Us seniors get along well and help each other in different ways. You ought to see the fancy cap Russell made me He's taken up sewing as a hobby, his hands not permitting much else, and takes prizes from women at the fairs. Faniest-dressing dude on Old Receiver Road, he is now.
