

JDW-Tonight's TV news has pictures of terrible storm damage in LA (right where Paul W. lives, too) and accounts of your severe storms. Hope you had no washing after all the drought. We've had heavy snows with a warm hard and copius thaw that then became ice. We are making out okay and the several hours I spend each sunny day attacking the ice is good for the arms and the arterial problem below them. ...FBI doing some stalling on other 40,000 JFK records so we'll be filing a motion to compel on them next week and two more suits. Maybe they'll get the idea that stalling does not pay - except in preventing my writing. Know you are busy. Hope well. Best, HW 2/10/78
