

As I think the enclosed will indicate, had a significant victory against the FBI/DJ this past Monday. The 60,000 pp are at the Frederick P.O. They came during the night. We are, for practical purposes, snowed in. Not if there were to be, shudder shuder, an emergency. Because I feared the post office would undertake to make delivery I asked my neighbor at the end of the lane how it was out in the world. I then called the post office and they were indeed planning a special afternoon delivery. I discouraged this and they appreciated it. Maybe they will come tomorrow. I got the file cabinets in before the second snow storm. We are in okay shape for a storm. Plenty of food in the freezer, which is in a cold place. A two-day supply of fire wood, maybe part of a third. Not having been able to replenish I've been holding it for an emergency. CB if the phone lines do go down, not impossible with a sleet buildup, the reason I got the CB, never used but tested. Enough batteries for radios so we'll know what is going on. More or less. Actually, if you are aware of the stories, we are on the edge of the worst of it, which ~~isxax~~ begins a triple to the north and a little more to the west. Much of the recent TV(exercycling) news has been on weather, so I know you've had a lot of rain and that it did finally stop. Our best, HW 1/20/78
