

JDW-We both enjoyed your account of your reunion with Guth and the expedited cheeses - more than half the continent ~~was~~ in less than half the time it takes my incoming and outgoing to go 50 miles!. ...I've been trying to get Lil interested in the gadget that permits rapid change of Wok temperature with an electric range. I'm hoping your 1/9 makes the difference. I have a friend who got one for his wife and they think it works fine. Lil has only the electric one, which she likes, if not for Chinese cooking. ...The enclosed stories again not used in papers I see. The Sculz one repeats what or rather some of what I'd heard long ago from the right, Lonnie Hudkins, who said his source was CIA, which he says he also has been. Bud told Jim Lesar the corpse is not Paisley from dental evidence. ...Lane-Garry content of Peoples Temple always interesting. Understand NYBar Assn has announced investigation over his alleged chese sandwich story. Alone than one will not stack. ...We also had a good if quiet holiday, respite on several days from more intense work...I'll try to memorize the New Years greeting for t e Maios. I think they'll enjoy it, as you do. ...Right now I'm about to confront the newest conspiracy as the day dawns. A week ago today, with the first snow for which I was home, I ~~decided~~ decided not to spent this winter as last, chipping away at ice so think that when I finished the job the end of "arhh at the road end of the lane the remaining ice was still 6" thick. So I bought a snow blower by phone knowing al could trust a neighbor's judgement as you can your radio shop. He is sales manager for the local I-H distributor of farm equipment. He had ond recommendation and only one blower, which he had no need to unload. He delivered it, with a man to show me how to use it, and it worked fine. I had the whole think cleared in 30 minutes. Well, yesterday I could not leave home to go to an important court session (which JL confesses he blew without me) because when I saw an inch and heard schools were close I phoned State police. They said stay home! Ice under snow. I did, and after daylight again cleared the lane and the turning areas in less than a half hour. No sooner completed than fine snow began to fall again. Now the report is freezing rain to be followed by rain. I shudder to think of what will happen to the lane when the rain falls on all that sub-freezing mass! But if I can hold a footing on the sleet ~~1/4~~ and if the machine will handle the hard surface, I'll be at it when I can see - and try to defeat these nefarious spook conspiracies" Best, HW 1/13/79
