

JDW- Silence does not mean that we do not think of you often for we do. Means we've been that bust, "il with her tax work, me mostly court work. With a brief respite from that I've been tackling the towerings stacks of accumulations, some long forgotten about.

In the few minutes before the mail comes, after which I must change and leave for a speaking engagement in Syracuse, an update.

Win or lose all the FOIA cases are victories. As JDW unde stands much better than that other college-trained historian, "esar, if nothing else I am making, very quietly, quite a record for history and a permanent, official record at that. All subject to confrontation and refutation and none of either ever attempted.

The latest major victory follows my decimation of a fink judge in affidavits (he'll retaliate but he remains silent) before whom all the JFK cases now are. Rather than risk a court fight the FBI has accepted a compromise, elimination of leads to actual symbol informers, from the major JFK index I found in Dallas- 40 linear feet of 3x5 cards. Dave will have an unprecedented treasure!

For some reason I can't explain people are knocking at the lecture bureau door (not often enough) for me to speak on King. Tonight the fifth since late November. I'm using this to pay a fine, bright, pleasant and quite sharp student at Hood. She dropped out for a while and while thill young is a bit older and more mature than most college women. She is putting the hundreds of thousands of FOIA pages in order. As she does she sometimes spits things she thinks I should read. When this happens I read the entire Volume. When I'm tired, when I rest, these are fine for that kind of time. So I'm finding out all sorts of things about us. Now how we entertained people from the Russian Embassy. I never knew we entertained ghosts! None was ever at our place in person. (One would things that despite iss many arcane skills the FBI would have known of travel restrictions on them during the years of our farming and that we were outside that limit.

More of the same nature. And distributed as real throughout the government. To and including the White House,

I can only wonder how many judges, especially a few inDC and the one in the Ray case in Tenn. (I found a record inst ucting the Memphis Field Office to tell unnamed officials about me down there and ordering a report but I've not found the report.)

Yesterday JL finally agreed to demand a judicial inquiry into fraud on the court in one case where the case is clear. He has been reluctant and may change his mind but if he does it, especially now with the DJ leaning on Congress to amend FOIA, we can fat some fies and I want to very much. This, if he does it the way I asked, will include DJ counsel. They've gone too far and I've caught them.

I think we've won another rmeand in the spectro case, broadened as the first case under amended FOIA to include the neutron activation analyses. I think this will make more hostory for Dave with "new evide ce" I've found thanks to the selection of volumes by this young woman and what I've been reading in them. Other shots, whether or not connected with the JFK assassination. (One pretty clearly was.) They've hidden from me existence of the making of the tests and their results, what is at issue in that suit.

The weather is breaking. I say is because below freezing nights still. I'm getting a little outside work in. One of what "il calls my toys, a shredded (of wood, not paper) has chewed up most of the accumulation of brush after the winter's forewood. All except where I've not been able to take it. Not light, if on wheels. Not self-propelled. It'll make great mulch or compost. Thanks to National Enquirer, whose fees have paid for several other such handy gadgets, enabling me to do what otherwise I would not be able to do.

Mail here, Best wishes from us both
